

desktop anywhere™

UNIVERSAL ACCESS

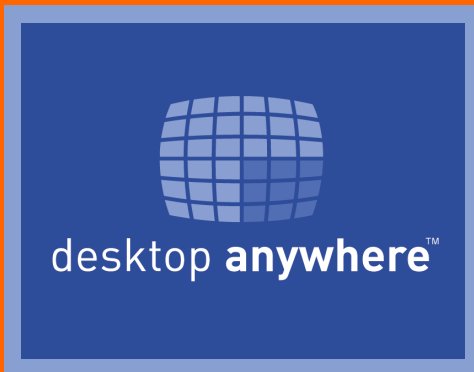

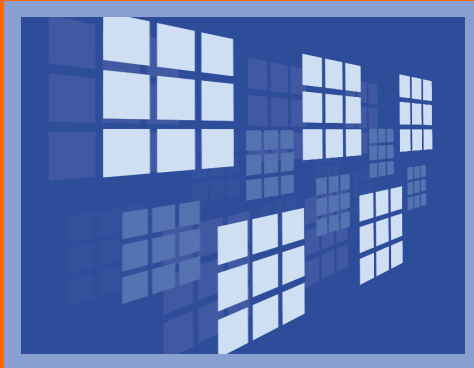

Everywhere you need it - Anytime you want it

The IT Challenges You Face . . .

- High support costs
- Reliability issues
- Need for remote application access
- Maximizing return on investment
- Synchronized application access
- Incompatible systems

Desktop Anywhere™ Solutions:

Desktop Anywhere provides everything you need to transition your existing IT environment to a reliable and secure environment that may be accessed from anywhere.

INCREASE reliability, access, and security by transitioning to a more efficient, server centric architecture. Streamline software delivery without upgrading hardware and software.

MAXIMIZE your existing IT infrastructure investment by creating an open, secure network. Desktop Anywhere provides the expertise you need to get the most from your investment in information technology.

EXTEND the reach and productivity of your team by enabling them to access their applications anytime and anywhere.

DESKTOP ANYWHERE PROVIDES:

- Server centric compatibility assessment
- Comprehensive transition services
- Parallel implementation
- Internal IT staff training
- Ongoing support
- Management services
